

Project Report

Filtered data:

- Number of filtered tweets: 396
- Number of tweets that are literary: 462
- Number of tweets that are non-literary: 142

Annotation:

RC-Type	RC-Head	Role
Mostly restrictive, only a very few are non-restrictive	"who" is mostly followed by "you"	Almost always "other", a very few of them are "obj"

Research result

- Number of tweets per pronoun + who pattern: 338
- Our result is comparable to CTK's result, in the fact that we have also discovered a large amount of PRC style tweets on twitter.
